

- Need to add an extra Cetop3 valve in a pre-existing system?
- Don't want to disturb the existing Cetop3 subplate and all the valves and connections?

Hyteco has just the answer - simply install a Hyteco Add-on Sandwich. Easily mount these Sandwiches between either the first or last valve and the Multi-stn manifold, bolt on another valve and attach the new hoses. . . . Very quick and very simple!!

As with all our Standard Products, these Add-on Sandwiches provide the industry with the best in design innovation and product quality.

Add-on Sandwich mounted on a Cetop3 Multi-Stn Manifold

Add-on Sandwich with a Tank-top Cetop3 Subplate

Description

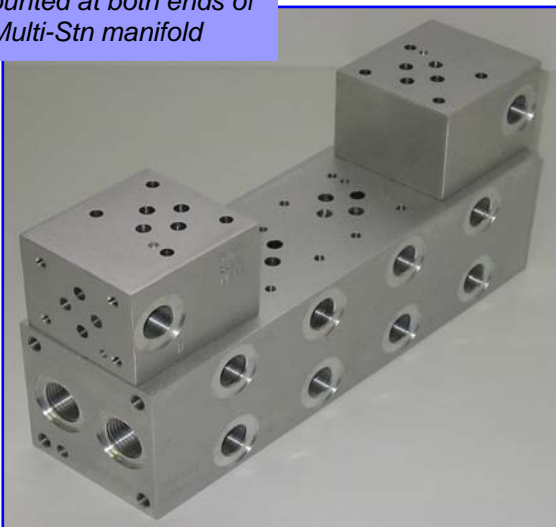

The basic design is a Cetop3 Sandwich with an additional Cetop3 interface on one side of the sandwich.

Internal connections allow either Parallel or Series flow path between the original top valve and the additional side mounted valve.

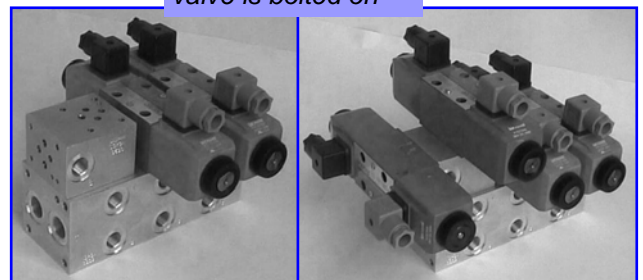

Standard Features

- Choice of Series and Parallel internal flow paths
- Choice to mount on either end of a Multi-stn manifold
- Standard height to clear most valves
- Several sandwiches and valves can be stacked
- Easy to install

Two Add-on Sandwiches mounted at both ends of a Multi-Stn manifold

Add-on Sandwich assembly before and after the add-on valve is bolted on

Ordering Code

Part No	Flow path	Mounting position*
S3P3A	Parallel	P side
S3R3A	Parallel	T side
S3S3A	Series	P side
S3T3A	Series	T side

* The mounting position relates to the existing interface and which gallery "P" or "T" is adjacent to the side that the add-on valve will fit.
